PROJECT 03 / WEBSITE

PROJECT DESCRIPTION

1. The design of your personal portfolio website must be cohesive with all the rest of your personal materials (resumé, business card, self-promo, portfolio book, etc.).
2. The website must be easy to navigate and quick to load.
3. The portfolio website must contain the following:
 1. your name (prominently displayed)
 2. your contact information*
 3. your resumé as crawlable text
 4. a link to download your resumé as a printable PDF
 5. a brief, well-written bio
4. your portfolio with well-written descriptions/captions
 *Your email address and other contact information should be easy to locate. Spell your email address and provide a link. If you wish, you may spell it like so, chester[at]caad.ms-state[dot]edu. Do not use your student email account as you will lose access soon after you graduate.
5. Photos and captions/descriptions of work should match the photos and captions/descriptions in your portfolio book. For web use, photos should be saved for the web (using Save for the web... in Photoshop). Web photos should be in RGB format.
6. If you decide to include references as part of your printed resumé, remove said references from your web resúmes in an effort to protect private contact information. Instead write something like, references available upon request.
7. Like always, spell-check and proof-read.
